

CB SERIES PASS-THRU SYSTEM

CB Series Pass-Thru System

The CB Series Pass-Thru System allows a roofer or maintenance worker to continuously travel leading edge areas without reattaching at intermediate anchor points. It has been designed for application with CB Series installations as well as retrofitted to existing CB installations.

- Bolt-on Pass-Thru Top option for CB-12 & CB-18 modification
- Permanent or temporary application
- Removable horizontal lifeline attachment
- Provides attachment for up to four workers in fall restraint
- Provides attachment for one worker in fall arrest
- Will allow up to 120' span
- Pass-Thru Top allows for cable lifeline or direct attachment

1 CB-12 & CB-18

- Universal base plate
- Durable galvanized finish
- For use on wood, steel or concrete
- Available in stainless steel
- 12" Post: 16" x 16" Base
- 18" Post: 12" x 12" Base

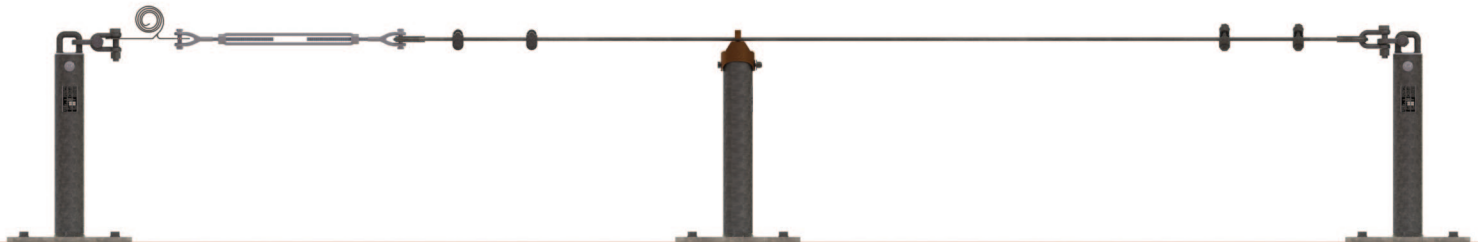

2 Pass-Thru Top

Pass-Thru top allows for cable lifeline or direct attachment.

3 Attached Slider

Permanently attached slider passes easily and hands-free through the Pass-Thru top. One worker may attach to each slider.
