53036	Gotcha Shark Rescue Kit w/ 215 ft. Rope	18.00
53037	Gotcha Shark Rescue Kit w/ 325 ft. Rope	23.00

## Gotcha Rescue Kit ↘

The Gotcha Rescue kit is a unique solution to problems faced by all workers at height who use PPE for protection against falls. Whereas most rescue provisions have focused on the more extreme activities carried out at height, the Gotcha Kit is designed for tradesmen who use common items of fall protection. In the event of a fall their situation, if suspended in a harness, is just as serious as any other worker and a swift recovery is essential. The kit will work effectively with conscious or unconscious victims, the rescuer can carry out the rescue from a point of safety, the rescue can be carried out by a single person, no cutting is required and you can raise or lower the victim in a controlled manner to the nearest point of safety.

- Suitable for rescue from lanyards & retractables
- Victim is raised to release from their original attachment
- No assembly is required by the user
- The kit is for raising or lowering a single person
- Color coded for simplicity

## Grabba ↘

The Grabba is an optional add-on to the Gotcha kit. It enables the rescue of persons suspended from retractable fall arrest devices while using rope or wire. The Gotcha Kit should be attached to the Grabba. The Grabba is then mounted on the rope or wire that the victim is suspended from. The Gotcha Kit is then extended so the Grabba slides down the rope or wire to the victim. When it reaches the victim the device locks onto the dorsal D-ring. When pulled upwards the Grabba grabs the wire or rope and a normal Gotcha Kit rescue can now be performed, raising or lowering the casualty to a point of safety.

## Gotcha Shark Rescue Kit ↘

A rescue kit that is ideal for those who consider work at height a key part of their skill such as those who work on towers and masts.

- Suitable for rescue from lanyards, vertical fall arrest systems & web SRL's
- Victim is released by cutting attachment with a unique bladeless cutter
- The Shark is a descent rescue kit
- No assembly is required by the user
- The rescuer accesses the victim in order to recover them
- Two person use – rated for loads up to 660 lb. in normal use
