

Kwik Kit® Safety Railing Kits

With preassembled uprights, assembly is intuitive. Elbows, crosses, and tees are already prefitted to the upright pipes.

OSHA Compliance With A Visible Advantage

Kwik Kit railing systems utilize reliable Kee Klamp® fittings, meet or exceed OSHA requirements for safety railings, and offer the visible advantage of Safety Yellow. The railings are 42" inches high and use 6 foot post spacing. Pipe outside diameter is 1.90".

Uprights Are Preassembled —Installation Time Now Even Faster

Kwik Kit Safety Railing Kits allow you to create a sturdy railing system with no welding or threading. Because your uprights are preassembled, installation is fast and easy. Elbows, crosses and tees are already prefitted to the upright pipes. Kwik Kit railing kits are easy to assemble using a standard hex tool to tighten the large, easy to use set screws. Available in Straight Kits, Corner Kits, or Extension Kits. By using a combination of kits, you can achieve almost any standard railing configuration. Rails can be cut where shorter sections are required. The kits can be secured using bolts or chemical anchors.

Kwik Kit Safety Railing Kit Benefits

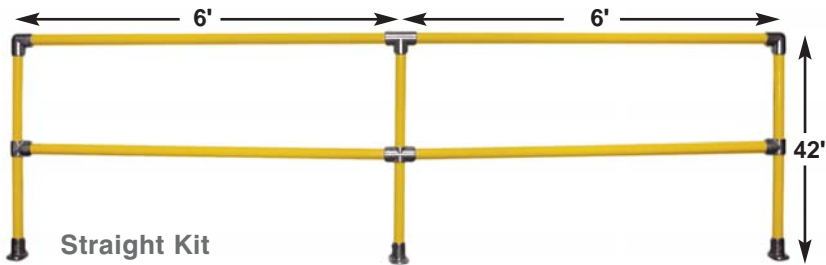

- Strong and safe, Kwik Kit exceeds OSHA and BOCA standards
- Reliable and durable fittings are corrosion resistant
- Safety yellow powder coated pipe for high visibility
- Easy to assemble using a standard hex tool
- Available in galvanized Iron/Steel or Aluminum
- 6-foot post spacing means lower system cost per foot
- Standard Pipe O.D.: 1.90"

Corner Kit

6' Extension Kit

Straight Kit

Toeboard Option Available

Meets OSHA requirements for toeboards. Stainless steel hardware included. Easy to install with no drilling or welding.

	Corner Kit	Straight Kit	Extension Kit
Steel	Kwik SC	Kwik SS	Kwik SE
Aluminum	Kwik AC	Kwik AS	Kwik AE
